

re-tur

Preparations

Print the game on two sides, preferably on a thicker paper. Laminate for durability.

How to play

Each player has their own pawn. The chips are placed on the table with the green side up. The starting player picks up a chip and places it under recycling, food waste or household waste, depending on how the item should be sorted. Then it's the next player's turn. If the column is already full, the chip is to be returned to the table before it's the other player's turn.

If you get a chip with a recycling-symbol you may take a chip from your opponent's pawn. If you can come up with something to do with that item other than throwing it away. You may not take items that your opponent has already taken from you. The chip gets placed in the column with the recycling symbol. If you can not take anything or can't come up with anything, just put the chip back on the table and it's the opponent's turn.

The player that first fills their pawn wins!

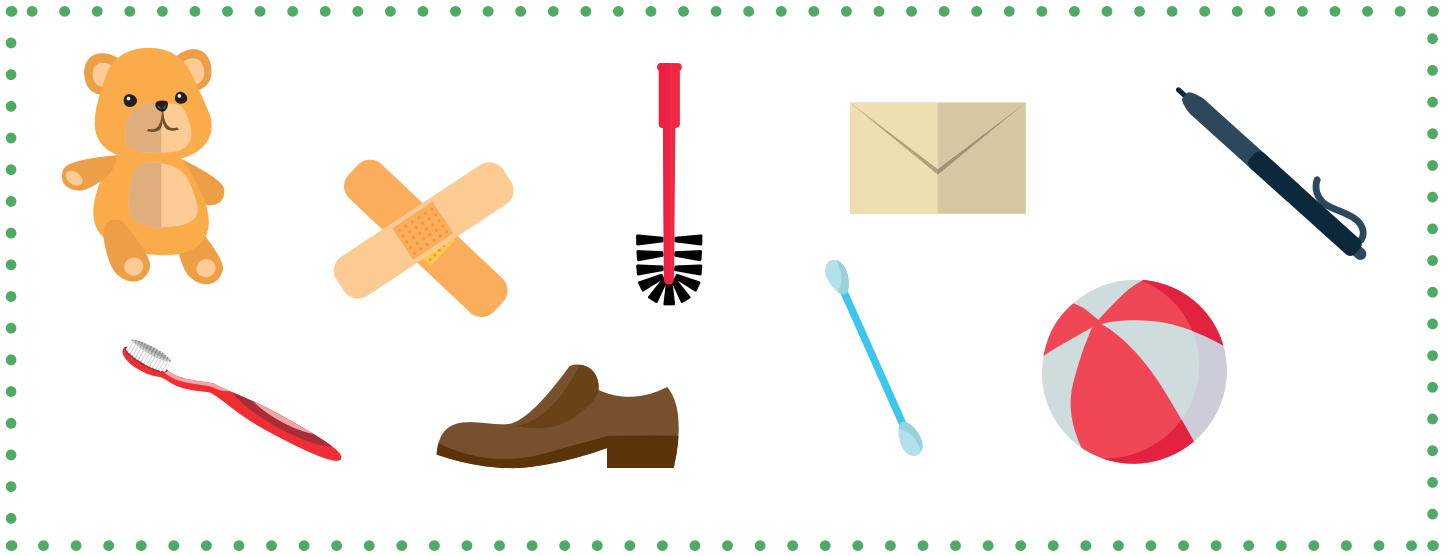

How to sort

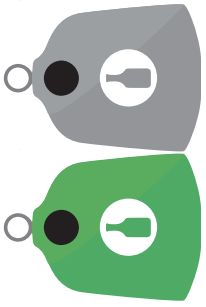

Food waste – if it is edible or has grown on something edible

Recycling – Newspaper or packaging

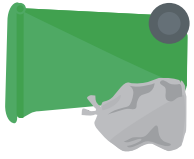

Household waste – Burnable waste that isn't packaging

Apple core	Food waste	Juicebox	Recycling
Ball	Household waste	Ketchup bottle	Recycling
Banana peel	Food waste	Milk carton	Recycling
Band aid	Household waste	Pasta	Food waste
Bread	Food waste	Pen	Household waste
Broccoli	Food waste	Pineapple	Food waste
Can	Recycling	Q-tip	Household waste
Caviar tube	Recycling	Schampoo bottle	Recycling
Cereal box	Recycling	Shoe	Household waste
Chicken	Food waste	Soap bottle	Recycling
Envelope	Household waste	Tea bag	Food waste
Fish	Food waste	Teddy bear	Household waste
Glass bottle	Recycling	Toilet brush	Household waste
Glass jar	Recycling	Toothbrush	Household waste
Hot dog	Food waste	Tube	Recycling
